Fukushima Daiichi Nuclear Power Station: Unit 3
Measurement of Radiation Dose of Emergency Gas Treatment System and the Result of the Status of Valves

Legend for the status of valves
- Stand-by / Power failure
- Valves in the picture are all air operated ones
- Valves in the circles were confirmed to be the status same as the power failure [open] at the investigation of the site on December 22

Exhaust fan
To exhaust stack

From reactor building
Closed/Open

From suppression chamber
Closed/Closed

Ventilation line
Closed/Closed

Approx. 18mSv/h

To main exhaust stack
Closed/Open

Approx. 2.0mSv/h Approx. 1.3mSv/h

Approx. 3.5mSv/h

Approx. 0.7mSv/h (System A)

Approx. 1.5mSv/h (System B)
