

## Not capitalize on the evacuation of the province dose data, loss of function in the communication

10 days, held a review summary, the results of both the initial response verification Prefecture after the earthquake and nuclear accident-health management survey residents prefecture was released on 9 September regular prefectural assembly was focused questions.

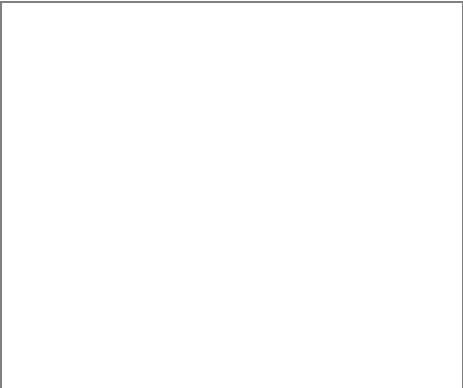

The accident Fukushima Daiichi TEPCO, Sun 12-15 March 2007, data of the radiation dose space were measured, such as Futaba-gun is not transmitted to the disaster response headquarters province, prefecture has not been utilized for evacuation of residents. Director Hiroyuki bamboo rough living conditions revealed Yoshida asked lawmakers. That after the nuclear accident, radiation dose measurements directly to ensure the safety of citizens, there was a problem with the initial response of the county and country I was highlighted again.

According to the department, the data was to be centralized in government Emergency Response Headquarters. Measure the amount of radiation from Ma year, officials of prefecture nuclear center and the results were reported to th Headquarters for all this. Off-site Center Headquarters was put communication information is fragmented in the earthquake, can not transmit the data gathered can not manage the data up to 15 days same to withdraw the prefectural government has continued however. Measurement data information was not in the country or province for this purpose.

June 3 last year, the Ministry of Education, Science and Technology has announced the results of measurement of the Sun 11-15 March said, I did not know that the county data is not revealed until that time.

I showed mismanaged "has been measured as much as possible, there is a problem with the information sharing country, province" is director Ara and bamboo.
