Mass of adhesive tape high mountains of Tottori, radiation levels

ツイート 412 Recommend 1: おすすめ チェック

30 days, in the mountains of Iwakura Tottori, Tottori Prefecture he announced from the waste that was illegally dumped on the surface road city, and found (1 square meter) chunk of adhesive tape with high radiation levels.

According to the department, as "not at a level that has immediate effect on the human body," good at about 600 times the amount of radiation that exist in the natural world, the incidence of cancer will rise 5% if you hold up days, about 170 near are. Ken was sealed off to within 3 m radius of the tapes in the field.

Radiation dose rate of the tape is 24 micro-sievert per hour was found (about 60 centimeters long, 10 centimeters each vertical and horizontal) concrete piece of 6.12 micro Sievert said to others.

Detect radiation by examining the piece concrete industrial waste disposal due to renovation of the slope, were removed waste around brought back on the 29th, the city and the province that received the notification that the adhesive tape on the 30th I found a lump. From the tape, radioactive substances such as radium five is detected.

In the east about 4.5 km from Tottori Station JR, site is approximately 1.3 kilometers away near the village.
