"Preventing diversion" weapons reconstruction budget of 500 million yen in the melted nuclear fuel metering

ツイート < 142 | BI 0 | チェック | Recommend < 42 | 2 | Morning, October 18, 2012

How much will I have left to uranium and plutonium TEPCO Fukushima Daiichi Nuclear Power Plant -. Ministry of Education, Science and Technology has invested 500 million yen this fiscal year, in order to develop a special account restoration weighing technology that. Of that, there is an obligation to prove to international organizations that it is not diverted to nuclear weapons is the reason. That someone or bring up the nuclear material of the Fukushima Daiichi melted, or is it possible in the first place but diversion. Uses for their reconstruction budget is questionable. Statement (Kato)

復興予算 に交付予 算要求中 の 日本原子 力研究開 発機構	事業の概要	2012年度	13年度	※2013年度は概算要求額
	核融合に関する国際的な研究開発拠点を青森県と茨城県に構築	42億円	48億円	
	福島第一原発の廃炉の参考にするため、茨城県内の実験施設2カ所を解体	-	9億円	
	福島原発の原子炉内の核燃料物質の計量技術の研究開発	5億円	5億円	

Hits in the study (Tokai, Ibaraki headquarters) Japan Atomic Energy Agency administrative institution to operate, such as "Monju" prototype fast-breeder been the budget request for the same purpose in the budget for the next fiscal year. budget request or in the name of "research reactor decommissioning costs" facilities, budget or are recorded in fusion energy research, the mechanism of is flowing in a variety of ways.

Countries possessing nuclear weapons to non-members of the (NPT), it is required to report the amount of nuclear material held by the International Atomic Energy Agency (IAEA) Nuclear Non-Proliferation Treaty and Japan. It's to make sure the military has not been diverted. "In the future, if you remove the nuclear fuel from Fukushima Daiichi, stored in a different location, must be weighed because there is an obligation to report to the IAEA" and for this ministry. But what to do with the measurement of nuclear fuel melted as the Fukushima Daiichi do not have strict rules.

Case (1986), because it was covered with "sarcophagus" to contain the molten fuel, No. 4 that caused the accident was not a discussion of Chernobyl former Soviet Ukraine.

What about how to monitor and manage the nuclear fuel melted "(nuclear energy policy) What should not be a budget request from doing its discussion. International debate is not enough, Associate Professor Tadahiro Katsuta of Meiji University pointed out, "I feel intention to budgets to find the new research themes. I'm talking, "There is also unsure whether the technology can be developed weighing really, you should do your explanation to the people," and on it.

Original text

機構をめぐってはほかにも、実験施設の解体費用が「廃炉研究」名目で概算要求されたり、核融合エネルギー研究で予算が計上されたり、さまざまな形で復興予算が流れている。
