<Fukushima Daiichi> amount released TEPCO 4 trillion becquerels debris removal up to

Mainichi 38 minutes delivery (Mon) 22:00 July 14

TEPCO head office in the (central) = Uchisaiwaicho, Chiyoda-ku, Tokyo, taken from the headquarters helicopter

Problems that might radioactive material scattered in the debris removal at the time of August last year TEPCO Fukushima Daiichi nuclear power plant, contaminated paddy fields of Fukushima Prefecture Minamisoma away 20 kg or more, the 14th, TEPCO from the same primary It was found that it was estimated at 4 trillion becquerels up a total release of radioactive cesium. However, not published as "calculations Ozukami fairly", it was not transmitted to the city. Or paddy pollution fly radioactive material in the debris

removal [let me know of news] According to TEPCO, the estimated amount released on the basis of rising degree of space radiation dose actually measured in the monitoring post the prefecture Futaba and on-site, of Namie town, the weather data. Was released in the debris removal in 100000000000-1 trillion becquerels per hour, we estimated a total of 4 hours release time. 4 trillion Becquerel, amounting to 10,000 times more radioactive cesium released per day from the Fukushima Daiichi nuclear power plant after the accident. In Minamisoma, I estimated cesium has been deposited 0.04 becquerel per square centimeter at most. Even while explained, "a possibility that radioactive substances extremely small amount has reached Minami Soma can not be denied," said TEPCO causal and that the cesium in excess of (100 becquerels per kilogram) reference value from rice in the city has been detected I have "Shirezu, can not definitively be due to radioactive material immediately after the accident," said about the relationship. At the request of the Ministry of Agriculture, Forestry and Fisheries, TEPCO conducted this trial. Convey the results to the Ministry of Agriculture, Forestry and Fisheries in April, that information was also provided to the province in June. Okada [British]

見事なまでのコントロールじゃないか、
しかし４兆ベクレルとか想像できんのだがそれでも福島は人が住めるのか？
これでも風評被害とか言うなよ

これじゃあ、どこに飛んでいるのだか判らないぜ。
みんな、夏休みに福島へ行けるか?
今頃こんな発表されたら、危険がいっぱいで行くなと言っているようなものだぜ。
